ACKNOWLEDGEMENT

We would like to express our sincere gratitude to Mr. Kiran Mulmi, our lecturer, for his invaluable guidance throughout this project. His continuous support and insightful advice were crucial, especially during challenging moments, and played a significant role in the successful completion of this project. We are also grateful to all the academics who provided us with the necessary direction and resources. Additionally, we would like to thank our families and friends for their unwavering support. Without their help, this project would not have been possible. Lastly, we appreciate everyone who offered their encouragement and assistance during the course of this work.

ABSTRACT

The development of a **Social Media Platform** aims to provide a streamlined, efficient, and engaging environment for users to interact, share content, and connect with others. This project focuses on creating a dynamic platform that allows users to post updates, interact with posts, and manage their profiles, ensuring an interactive and user-friendly experience.

The primary objective of the platform is to enhance social engagement by integrating features like post creation, interaction (comments, likes, and shares), and a notification system. The user interface is designed to be intuitive, allowing easy navigation for a seamless social experience. Additionally, the platform supports friend requests, profile management, and an efficient messaging system, ensuring users can connect and communicate easily.

The platform also incorporates analytics tools, providing insights into user activity and engagement trends to enhance platform performance. The system is built for scalability, ensuring it can handle increasing numbers of users and interactions without compromising performance or security.

Ultimately, this social media platform aims to create a space for users to connect, share experiences, and interact with one another, fostering a sense of community and enhancing overall user satisfaction.

ABSTRACT

CHAPTER 1: INTRODUCTION

1.1 Background

1.2 Problem Statement

1.3 Objectives

1.4 Scope

1.5 Target User

1.6 Motivation and Benefits

1.7 Constraints

CHAPTER 2: LITERATURE REVIEW

2.1 Introduction

2.2 Global Trends

2.3 Existing Systems

2.4 Key Features

2.5 Summary

CHAPTER 3: SYSTEM DEVELOPMENT METHODOLOGY

3.1 Introduction

3.2 Agile (Scrum) Methodology

3.3 Development Tools

3.4 Domain of Execution

CHAPTER 4: SYSTEM IMPLEMENTATION AND TESTING

4.1 Introduction

4.2 System Implementation

4.3 Test Environment

4.4 Test Cases & Results

CHAPTER 5: CONCLUSIONS, RECOMMENDATIONS, AND FUTURE WORKS

5.1 Conclusion

5.2 Future Works
